RE: Please adopt no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Scott Hilliard
557 Fairfield Drive
Greensburg, PA 15601

RE: Please adopt no-drill zones now

Dear Governor Shapiro,,

I am writing to urge the same or even greater distance between fracking and schools.

Children are more vulnerable than adults to environmental health hazards. Moreover, when at school - or in childcare - they are in congregate settings for children with a generally poor record of attending to the physical environment. We agree that the closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources.

In New York State, we illustrated the risks to schools and occupants -- 95 % of occupants are women and children -- by documenting the number of schools relying on their own water wells for drinking water. It was an impossible regulatory dilemma for the state health and environment agencies. Also impossible to determine, the actual locations of old oil and gas wells scattered across NYS. Schools are enormous civic investments, in fact, the second largest form of all public construction after highways. It makes no sense to compromise the environmental quality of these facilities, which are already well established to be unprepared for severe weather events and for the next pandemic..

Schools are congregate settings for children; all states require children to attend school. Schools have a very long history of constructing new buildings on compromised sites (despite EPA guidance on siting), and a long history of ignoring school environmental concerns such as indoor air quality. It is a potent combination, to neglect outdoor local hazards, ignore prior compromising uses of land, and also to ignore the plight of vulnerable children compelled to be in poorly maintained schools.

Numerous peer reviewed studies have established that poorly maintained or polluted schools damage children health, thinking, learning, and behavior.

Moreover, living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Thank you for your consideration,

Sincerely,
Claire Barnett

Citizens in communities affected by close drilling have been pushing back against these threats from fracking. This push back involves extended legal efforts in the courts when possible. It is these individual citizens and small non profit organizations who are raising funds to pay these legal costs. Oil and Gas companies have large budgets and can easily sustain their legal costs. As citizens we are increasingly at a disadvantage. It's time that state and local governments take their share of the responsibility to protect the health, safety and wellbeing of the tax paying citizens they have been elected to protect. PLEASE ADOPT NO-DRILL ZONES THAT ADEQUATELY PROTECT US NOW!!!!!!

Dear Dear Governor Shapiro,,

Time Is Now For No-Drill Zones Period.

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Perry Gx

Today I am fighting this industry that claims to have mineral rights under my land. The short setback distances today would not protect me and my family from all the negative consequences of living so close to fracking infrastructure. This had to change.

Sincerely,
Henry Berkowitz

Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Claudia Leung

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Jon Nadle

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Even more importantly, both Green Space reduction and emissions from fracking contribute to our precarious environmental state and climate change.

Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

With less than 60% of the country even willing to work, we are urging you to find a safer way to "provide jobs for the good people of Pennsylvania". (And while you're at it, it's time that working becomes mandatory to get people off of welfare and disability). Disability. But again, we need for you to protect our health & environment, and look for better ways to provide jobs.. and [make] people work.

Sincerely,
Cynthia Clark

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Mike McCampbell

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Jennifer Clark

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

I write as a Registered Nurse deeply KT concerned that PA has not improved their setback requirements for wellpads. We know the dangerous health effects from fracking. Children's lymphoma and asthma, low birth weights, shortened lifespans for seniors of two plus years, and the list goes on including rashes, nose bleeds, mental health conditio, cancers, etc. The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to additional health effects like heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. RE: Please enact no-drill zones now

Dear Governor Shapiro,,

The USA has so much gas and oil that we export more than we import. We are, in fact, the largest exporters of energy in the world. Gas is flared to get to oil or just left to leak into the atmosphere, exacerbating Climate Change. The Commonwealth charges almost nothing for the right of these drillers to pollute our air and water as they make fortunes sending our liquefied gas overseas. They pay as little as possible to private landowners for gas rights. Often much less than they owe. There is little to no benefit for average Pennsylvanians.

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Patricia Libbey

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens Pennsylvanians' health and our resources. Numerous studies have established that living near fracking exposes residents to hazardous levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious medical problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals.

Polling has shown that 74% of responding Pennsylvanians support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

As a constituent and voter, I strongly urge you to institute a statewide no-drill zone rule at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals as well as no-drill zones around streams.

Sincerely,

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Megan LeCluyse

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. And are the drillers using fracking paying for or at least helping to pay for the damages they've caused? As you know, the answer is, for the most part a big no. This is totally unacceptable to me as a Pennsylvania resident. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

As a well know shoe company used to say, "just do it".

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

On behalf of our members and allies across Pennsylvania, I am the staff person for Peace, Justice, Sustainability NOW! an Associate member Group of Peace Action and we endorse this message. Fracking is just kicking the can down the road and not worth the substantial risk's involved. We need to end use of all fossil fuels.

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Steven Patterson

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

Dear Governor Shapiro,

Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals.

No surprise that polls of Pennsylvania residents have shown that 74% of respondents support larger no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. For all of these reasons, I urge you to institute a statewide no-drill zone rule, in distances at least as far as those recommended in the Grand Jury report, around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

In earnest, Melanie Pallone, J.D., Ph.D

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Paul Beach

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

Greetings Sam,

Fracking and its infrastructure are dangerous when near our homes, schools, hospitals, streams, and other public resources. Fracking threatens people's health and these resources. Living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

Please institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Kind regards, David Mindel

Sincerely,

David Mindel

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Connie Fleeger
246 Election House Rd
Butler, PA 16001

RE: Please adopt no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Lisa Hladio
404 Belaire Rd

RE: Please adopt no-drill zones now

Dear Dear Governor Shapiro,,

I am one of many concerned about the continued impacts of fracking on drinking water and human health - effects including asthma, birth defects and premature births, and cancer.

While many protections are needed, one way to mitigate the dangerous consequences is to establish a no-drill zone between homes and other sensitive areas such as hospitals, schools, and prisons. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Susan Loucks

I would remind our officials that the Constitution of the Commonwealth of Pennsylvania, Article I, Section 27, provides: "The people have a right to clean air, pure water, and to the preservation of the natural, scenic, historic and esthetic values of the environment. Pennsylvania's public natural resources are the common property of all the people, including generations yet to come. As trustee of these resources, the Commonwealth SHALL CONSERVE AND MAINTAIN THEM for the benefit of all the people." It doesn't say "might" or "should". It says SHALL. It's an obligation, not a choice.

RE: Please adopt no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Laura Manz

RE: Please adopt no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. Research has also found that increased fracking activity is associated with high rents and increased rates of eviction among long-term residents of communities.

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. RE: Please adopt no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Kathleen K Harr

RE: Please adopt no-drill zones now

Dear Dear Governor Shapiro,,

Dear Governor Shapiro,

I am a Pennsylvania voter who supported and campaigned for your candidacy in 2022, because I'm concerned about having a clean environment and mitigating global warming. At present, I'm concerned about your administration's lack of effort to create the no-drill zones as promised in your campaign platform.

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. RE: Please adopt no-drill zones now

Dear Dear Governor Shapiro,,

Dear Governor Shapiro,

I am a pediatrician; I care about my patients' health. I am a father; I care about the health of my children. I am a taxpayer in Washington County; I care about the health of my neighbors and my community. There is no denying that fracking degrades the environment, contaminates the air, water, and soil we all share, accelerates climate change, and makes people who live nearby and workers in the gas fields sick. Please don't disparage health experts as "extremists" as you have done. Knowing these facts beyond a reasonable doubt regarding fracking and yet allowing it to continue operating in Pennsylvania IS extreme; permitting its expansion here is radical and deeply irresponsible. Producing blue hydrogen will increase fracking and worsen the state of the climate crisis and the health of Pennsylvanians, especially those who are poor and have little agency to protect themselves from harm. Ditto carbon capture and storage -- two ideas that are half-baked and clearly contrary to any serious climate solution and protection of public health.

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

You know that 500 feet is too close to homes and schools and businesses -- you don't need anymore scientific studies to know that. You also know that your (offensive) agreement with CNX (600 feet) is too close. Practically every researcher who studies health impacts from fracking tells us that fracking is inherently unsafe, that health is at risk, and the risk is higher the closer one lives to fracking operations. The studies conducted by the University of Pittsburgh and PADOH (it's been almost a year and still no comment about them from you?) show elevated risk of adverse birth outcomes and worsening asthma up to 10 miles away from fracking wells! By allowing fracking to operate so close makes you and your DEP complicit in the damage.

Pennsylvania needs a climate hero and a champion for a cleaner environment and better health. Be that guy.

Ned

Sincerely,
Ned Ketyer

RE: Please adopt no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

I live within 1/2 mile of a proposed fracking well pad. I am almost 75 years old and cannot afford to move; am sickened at the thought of selling this house to someone and having proximity to the well kill them; and have too many of my own health problems to stay here. This is a poor community (environmental justice) composed of young families in a starter house and the old people who are still in their starter house because their financial rug was pulled out from under them.

I voted for you for Governor, as did my husband. We put up signs for you in front of our house in a predominantly Republican neighborhood. Among other reasons for our staunch support for you was your stance on fracking. Please do not disappoint us.

Sincerely,
Yvonne Hutchinson

RE: Please adopt no-drill zones now

Dear Dear Governor Shapiro,,

Governor Shapiro, you may remember me for my role leading the SWPA Environmental Health Project, and working closely with your staff when you were Attorney General on the Grand Jury report. I listened to a Public Source webinar today about a gas company harming fracking-adjacent communities in WV and PA, and I realized, not much has changed, if anything, since I left that work in 2020.

I'm shocked at the level of disregard for human health, property, and our state's ecosystem, all the natural systems that keep us alive and thriving. I'm shocked at the way your administration continues to disregard your own staff's findings. And I no longer feel that health is a true priority for the state of PA.

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Please restore my faith in the Commonwealth, and your administration. Thank you.

Sincerely,
Raina Rippel

Please look into this. I live in a 55+ community and they are putting a drilling pad in our back yard. Many of us have grandchildren that visit frequently. I am very concerned of all the impacts fracking has on children, elderly and the environment. I am aware some of our neighboring communities have well water and this would be affected also.

Thank you for your time.

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Rick Barber

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Dorothy Maurer

RE: Please adopt no-drill zones now

Dear Dear Governor Shapiro,,

Governor Shapiro,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and natural resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams and other natural resources.

Thank You, Shalom

Minister Teri Gilmore AS BS MS'

RE: Please adopt no-drill zones now

Dear Dear Governor Shapiro,,

I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. That Fracking is not regulated by the EPA is a national disgrace. At the very least The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

We are the citizens, we vote, and we are tired of being sickened and killed for profit.

Sincerely,
E Harris

Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. When you campaigned for Harris, you sounded like a man for the people. Was that just rhetoric? Have you sided with the oil companies and forgotten us?

We really can't catch a break between sell-out politicians, major corporations, big pharma & WEF, the people experience one blow after another! Our waterways will become polluted & wasted. Stratispheric Aerosole Injections have already devastated our air & foliage. Other states have banned that but it seems PA politicians are more beholding to the elites and/or Aipac than to the people they were meant to serve. People are really getting fed-up with the contempt that seems to be in place.

Will you stand with the people? I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams. And please consider a ban of airborne chemicals and heavy metals. More info is available at GEOENGINEERINGWATCH.ORG.

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Barbara Adams
527 Saint Andrews Drive

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Richard Metz

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

Hello.

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems, which I have observed in my family and friends. The 43rd Statewide Investigating Grand Jury recommends a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Thank you for reading this and have a nice day.

Sincerely,

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Janet Barricella

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

We don't need this natural gas or any oil extracted through fracking for our energy needs. What we need instead is an "Apollo Moon Landing Campaign," to transition to renewable energy now with just wind, solar, geothermal, & hydroelectric energy. We have the technology and the natural resources to do this now. The market is already reacting positively to solar and wind energy, which is surpassing fossil fuel & nuclear power to meet our energy needs. The only thing we lack is the political will to do so, because the dying, profit addicted fossil fuel, nuclear power & centralized electric utilities have bought the votes of our Elected leaders from both Political Parties. To save our planet, we need to transition now to renewable energy. We don't need natural gas as a "transition fuel." or an "all of the above" energy strategy. Go to <https://thesolutionsproject.org/> for plans for all 50 of the United States and 146 Countries from all over the world to meet our energy needs with just wind, solar, geothermal & hydroelectric power. We will not "starve and freeze in the dark," or "wreck our economy in the process."

I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

ANY REGULATION CAN BE WRITTEN TO ALLOW DRILLING CLOSER TO A HOME IF THE HOME OWNER AGREES. BUT WE HAVE A PAD 400 FEET FROM OUR BEDROOM WINDOW AND THAT IS RIDICULOUS. SURE THE WELLS ARE 500 FEET FROM OUT WATER WELL, BUT NO SAFETY IS PROVIDED FOR US AND THE 500 FEET FROM A WATER WELL AS THE SOLE REGULATION - REALLY! THE LAW TOOK A 1960'S DRILLING REGULATION FOR DRILLING ONE WELL AND THEN ANOTHER 900 TO 1000 FEET AWAY AND JUST PENCILED IN HORIZONTAL DRILL PADS WITH MULTIPLE WELLS AND GAS VOLUMES 100X'S OF SHALLOW VERTICLE WELLS

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
sherri dunn

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

Governor Shapiro,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Please help the environment and the people of Pennsylvania!!!

Sincerely,

SDP

RE: Please enact no-drill zones now

Dear Dear Governor Shapiro,,

I was born and raised in Venango County. I returned to my grandparents home in Reno, PA. We are facing water issues due to a violation of fracking disposal. The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

The people in Pennsylvania have endured unhealthy conditions for far too many years regarding the fracking and related structure issues. It is time to do something NOW, not wait until more and people and their families become ill or die of the consequences of hydraulic fracturing.

Sincerely,

RE: Please adopt no-drill zones now

Dear Dear Governor Shapiro,,

Dear Governor Shapiro,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. In the fall of 2023, I understand that you instructed the Pennsylvania Department of Environmental Protection (DEP) to implement some of the 43rd Statewide Investigating Grand Jury recommendations for better protecting Pennsylvania residents from oil and gas operations.

Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,

Nicholas Sanders

RE: Please adopt no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

RE: Please adopt no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. The waste brine harm the neighboring communities and put them at risk by transporting sometimes radioactive waste to be injected in deep wells which spills occur. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. In my community alone, we have been fighting 12 well pads for the last 10 years that are next to heavily populated areas. To evacuate 3,000 people when incidents occur is an impossible task, particularly for an industry that can not seem to conduct regular business without hundreds of violations to state regulations. These regulations don't matter if they are not followed and if DEP does not respond in a way that is meaningful to the community. Industry has for too long had their way with our natural resources and polluting our communities.

Governor Shapiro, you made promises you need to fulfill. You took an oath to uphold our constitution which includes our article 1 section 27 rights. We expect you to make good on that promise and keep heavy industry away from the people of PA. Thank you.

Sincerely,
Gillian Graber

Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Tom Pike

RE: Please adopt no-drill zones now

Dear Dear Governor Shapiro,,

Gov Shapiro

We know that you, as our former Attorney General, are very well informed about the harms of the fracking industry to our health and environment, and yet you are choosing to partner with CNX, a company with serious and ongoing violations.

"Radical Transparency" is pure rhetoric with no accountability from the industry or the state. How can we trust you or DEP, when DEP is underfunded and understaffed, and you make deals with unscrupulous and dishonest companies. Please accept these comments on my behalf.

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. RE: Please adopt no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,

Dear Governor Shapiro,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Sincerely,
Sharon Kessler

RE: Please adopt no-drill zones now

Dear Dear Governor Shapiro,,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. The presentations I have heard all show there is a direct, linear relationship of health effects and linear distance from gas wells. The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. RE: Please adopt no-drill zones now

Dear Governor Shapiro,

Hey everyone looked how dirty Beaver County roofs are. Encase your commercial open-air gas burners in Furnaces with Humidifiers and Air Filters. Open-air Gas burning asphyxiates, spews toxic noxious fumes, and soot. The commercial open-air gas burners are surrounded by metal inverted pyramid structures without a roof.

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Stephanie Ulmer

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Van Knox
1330 Creek Rd.
Lititz, PA 17543

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Judith Bohler
220 Meadowlark Dr
Ephrata, PA 17522

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Michael Lombardi

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Lynne Kaye

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

Proximity of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the well being of our Commonwealth residents. This type of verboten pollution, contaminates our precious air, water and land causing grave harm to human health. Most egregiously those living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

We desperately need you to ensure that Pennsylvania institutes a statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Perry Kendall

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Allyson Hamm

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

What is common sense? Caving to fossil fuel industries who make goo-gobs of profit while leaving geographical areas polluted, drinking wells contaminated, soil ruined, and removes forestland -- or establishing respectful, precautionary distances of fracking away from our homes, schools, hospitals, streams, and drinking water wells?

Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Jay Walker

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Thomas Vernon
2134 Spring St.
Philadelphia, PA 19103

- 750 feet from any surface water

PERSONAL ADDITION

As the sender of this form letter, I want to add my own thoughts as such:

1) There has been and will be fracking in PA, but while the debate of "whether or not there will be fracking" has gone on for decades, it has, unabated. The minimum We must do is enforce the highest safety protocols and shut down the business operations of out-of-compliance operators/owners/corporations.

2) If our natural gas resources weren't practically invisible as they are (being underground, transparent in gas form, and pipes off in contained methods that we don't clearly witness) We as PA citizens would be astounded at the amount of value that We have been robbed of. Literals Billions of dollars of unrenewable fuel has been extracted and taken away without our tax base being remunerated at any meaningful level. If it were our forests we would witness the denuding of hundreds of thousands of acres of resource for nary a penny of recompense. Make extraction companies pay for our fuel, better yet, keep it here and give PA residents a dramatically reduced rate of cost for this fuel to warm homes for generations untold into the future.

Sincerely,
Jonathan Fantazier

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Sandra A Foehl

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

Governor Josh Shapiro,

The closeness of fracking to PA homes, schools, hospitals, streams, and drinking water wells threatens the health of all Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human and animal health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

Therefore, I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Additionally,

Clean Air Council programs are supported by federal dollars which include actions such as putting up air quality monitors in communities and promoting public transit. We will not stand for this current Executive attack on the environment and the communities served. We need you to contact President Trump immediately and urge him to do all he can to reverse "The Federal Funding Freeze"! Help protect nonprofit funding now from this illegal Federal Funding Freeze.

Thank You Governor Shapiro

Minister Teri Gilmore

Sincerely,

Teri Gilmore

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Jeffrey Campbell

- 750 feet from any surface water

I am living in an area where CNX is busy every day - I have seen beautiful farmland converted to ugly industrial sites, with increased truck traffic destroying our local roads that were never built for the steady stream of "Sand Box" trucks and water tankers, as we watch the local water reservoir get lower than any have ever seen, in the 70 + years since the Beaver Run Reservoir was constructed - a water supply built for the local residents. Please calculate the cost of producing this un-green source of energy, and you will see, it is not cost effective. We will pay a greater price. Please -Protect our Land - Protect our Water - Protect our Health!!

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
David Gibson
1335 W Porter St

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

Dear Governor Shapiro,

This letter is coming to you for a problem I know you understand, but now fail to manage.

You know there are more clean energy jobs in PA than polluting energy jobs. You know fracking pollutes our air, contaminates our water and land, and harms human health.

People living near fracking experience negative health impacts at rates far greater than the general public. The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents, your constituents. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe.

Setbacks are a simple and necessary way to better protect PA residents from the harms of fracking. I urge you to ensure that our state institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Dr. Melanie Pallone

Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Denise HERBERT

I live DIRECTLY across the street from the Marcus Hook Refinery Compressor Station in neighboring Linwood, PA 19061.

The CONSTANT pollution being expelled into our air is toxic for us all. It is NOT far enough away at all and is also directly across the street from Linwood Elementary School!!!

It is about time you put the citizens FIRST! Our children are slowly, daily breathing in these toxins!

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
John Puc hniak

Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Patrick McCloskey

- 750 feet from any surface water

My husband and I live 1/2 mile from a proposed well pad. We are desperately trying to fight it. Not that our fight matters. The same company, Olympus--check their safety record, will have a fracking well pad about a mile from us. The site 1/2 mile from us will have a compressor station built on it. I do not think our court battle will stop that.

We are half past our seventies. With this house made worthless by the frackers, where will we go? Would you give someone in their seventies a thirty year mortgage? We thought that if we were abstemious, our savings would keep us covered. With the housing market as it is, our savings won't be able to cover a down payment. We live in Allegheny County. It's too populated to frack anywhere in the County. The University of Pittsburgh research says that people within 10 miles of a fracking well pad will be adversely affected.

Please, we need at the very least the minimum setbacks proposed above. I would like to see those minimums at the very least doubled.

Sincerely,
Yvonne Hutchinson

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Sharon Eisenhower
235 Rosedale Avenue
Wayne, PA 19087

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Kenneth Ellsperman

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

As time goes on, we learn more of how the closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents.

Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

Please ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with at least the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Thank you very much.

Sincerely,

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Susan Kawtoski
2810 Deer Leap Ln
York, PA 17403

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

As I'm certain you are aware: Article 1 Section 27, the Natural Resources and Public Estate section of the Pennsylvania Constitution, states among other rights that Pennsylvanians have a right to clean air and water. Also, these resources shall be maintained for all the people including those generations yet to come. With that in mind, please consider:

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Kathleen Connor
254 Ridgewood Ave

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

A state funded study from 2023 concluding that children living near fracking wells and other infrastructure have a 5-7 times more likelihood of getting childhood lymphoma.

Fracking also poses a danger to water miles from a well due to the long distance of laterals which can extend miles upon miles from the well site.

This is shown by water contamination in West Deer Twp Park from a subsurface fracking lateral. There are people whose water is so contaminated that it's not just undrinkable but also can be set on fire. We must protect our communities from such disasters.

Living in this region I've seen fracking companies consistently break agreements with people building fracking wells too close to people's property, contaminating people's well water, lying to county and city officials, as well as property owners about the risks and benefits. For example, I've seen gas companies tell municipal officials that they will see much higher funds from fracking than they ever actually give out and landowners being told they will receive compensation that they never actually receive.

Studies have shown that babies born near fracking wells are on average born earlier and with lower birth weights than regular babies. A Canadian study found that babies living with 6.2 miles of fracking wells in Alberta had low birth weight and abnormal birth defects.

The waste from the fracking process is radioactive and includes high levels of heavy metals and PFAS. We still have yet to find a safe way to dispose of it. Many are stored in tanks on fracking pads, some of it is dumped in landfills which increases pollution, and harms people. Injecting it into injection wells often contaminated people's water even more than normal fracking drilling, and in many parts of Pennsylvania its spread on roads as a dust suppressant allowing people to track radioactive waste into their homes.

As a young person who will have to live with consequences both relating to pollution and the climate crisis from fracking we need to stop. Fracking should happen nowhere near places where people live, go to school, worship and play.

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect

Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Sofía Gracia

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Kris Stotler

Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Walter King

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Bet Daniels
PO Box 1035
Milford, PA 18337

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

Greetings Sam,

Fracking close to homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air, water and land, harming human health. Existing fracking restrictions are do not keep Pennsylvanians safe. Setbacks are a simple and necessary way to protect residents.

Please help ensure that Pennsylvania institutes no-drill zone requirements for new wells with the setbacks of:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Regards, David

Sincerely,

Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Joyce Gilmore

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

This is the minimum protection that should be afforded to Pennsylvanians. You know the risks and harms of fracking from your time as Attorney General. These fossil fuel industries should actually be banned from our state and the country. They are responsible for global warming, pollution, illness and death. Our present and future require renewable energy and we demand it. Science and facts do not lie.

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

The closeness of fracking to our homes, schools, hospitals, streams, and drinking water wells threatens the health of Pennsylvania residents. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public. Existing siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. Setbacks are a simple and necessary way to better protect residents from the harms of fracking.

I strongly urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

Sincerely,
Susan Bingham

RE: Please institute common sense no-drill zones now

Dear Governor Shapiro,

As a resident of Pennsylvania, I am very concerned about the impact of fracking on our health and the health of the environment. Industry has been able to act with limited concern on our wellbeing and they have been able to frack close to our homes, schools, hospitals, streams, and drinking water wells. All of this is a major threat to our health. Fracking pollutes our air and contaminates our water and land, harming human health. People living near fracking experience negative health impacts at rates far greater than the general public and this is deeply concerning and unfair. Unfortunately, as things stand, siting restrictions for fracking are woefully insufficient to keep Pennsylvanians safe. I write to urge you to ensure that Pennsylvania institutes statewide no-drill zone requirements for new unconventional oil and gas wells with the following minimum setback distances:

- 3,281 feet from any buildings
- 5,280 feet from any buildings serving vulnerable populations (e.g., schools, hospitals)
- 3,281 feet from any drinking water wells
- 750 feet from any surface water

I hope you can take our health and environmental health into consideration, but ideally, please move away from fracking all together. We are living in a climate crisis and cannot afford emitting more methane in addition to the detrimental health effects of fracking gas.

Sincerely,
Magdalena Sikora

Dear Governor Shapiro,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at distances at least as far as those recommended in the Grand Jury report around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

RE: Please Adopt No-Drill Zones Now

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500-foot no-drill zone between fracking and homes, as well as a 5,000-foot no-drill zone for sensitive sites such as schools and hospitals.

Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to adopt statewide no-drill zones at distances, at least as far as those recommended in the Grand Jury report, around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Thank you.

Sincerely,
Tim Resciniti
1708 Potomac Ave
Dormont, PA 15216

These zones are very important. Unfortunately the oil industry continues to show they can't be trusted to do the right thing on their own.

Thank you.

RE: Please Adopt No-Drill Zones Now

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500-foot no-drill zone between fracking and homes, as well as a 5,000-foot no-drill zone for sensitive sites such as schools and hospitals.

Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to adopt statewide no-drill zones at distances, at least as far as those recommended in the Grand Jury report, around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

RE: Please Adopt No-Drill Zones Now

Dear Sam Robinson,

As you know, the DEP is currently not able to do more than slap the wrists and fine companies even if they have dozens of cases of causing public harm. The only hope residents have is for the legislature to enact more protective laws that keep these Deep Well sites far enough away from families that when they inevitably break the law and pollute, they are far enough away to limit how many people they poison.

In West Deer township where I live, we recently were able to defeat a deep well site that was far too close to our homes. The only reason we prevailed was due to setback limits. Without those protections, families across the state will continue to be poisoned and have their ground water ruined, rendering their properties worthless.

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500-foot no-drill zone between fracking and homes, as well as a 5,000-foot no-drill zone for sensitive sites such as schools and hospitals.

RE: Please Adopt No-Drill Zones Now

Dear Sam Robinson,

Dear Governor Shapiro,

You have become well aware of many of the significant risks as well as the damaging effects associated with the fracking industry.

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems. This exposure and its consequent health effects impose on Pennsylvania residents amplified health care costs and reduced quality of life.

The 43rd Statewide Investigating Grand Jury recommended a 2,500-foot no-drill zone between fracking and homes, as well as a 5,000-foot no-drill zone for sensitive sites such as schools and hospitals.

Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to protect Pennsylvania residents and our environment by adopting statewide no-drill zones at distances, at least as far as those recommended in the Grand Jury report, around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Thank you.

RE: Please Adopt No-Drill Zones Now

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500-foot no-drill zone between fracking and homes, as well as a 5,000-foot no-drill zone for sensitive sites such as schools and hospitals.

Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to adopt statewide no-drill zones at distances, at least as far as those recommended in the Grand Jury report, around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Thank you.

Sincerely,
KIMBERLY YARUSSI

RE: Please Adopt No-Drill Zones Now

Dear Sam Robinson,

I am concerned about the closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources. It threatens people's health and these invaluable resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury RECOMMENDS a 2,500-foot no-drill zone between fracking and homes, as well as a 5,000-foot no-drill zone for sensitive sites such as schools and hospitals.

Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals. I don't know that the poll asked about protecting natural resources and

I strongly urge you to adopt statewide protective no-drill zones at least at the distances recommended in the Grand Jury report, around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Thank you.

Sincerely,

RE: Please Adopt No-Drill Zones Now

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

How can we maintain healthy staff at our Middle School and healthy, smart students in our district when fracking is happening so close to their school? We have kids from an elementary school with Blue Ribbon recognition moving up to Middle School this year and I'm worried about them and about their teachers. My kids need an education, not increased cancer risk. My daughter is taking advanced math and ELA and we hope she will live long enough to have a fruitful and productive career. Don't throw away our hard work and investments in our schools and community as parents!

The 43rd Statewide Investigating Grand Jury recommended a 2,500-foot no-drill zone between fracking and homes, as well as a 5,000-foot no-drill zone for sensitive sites such as schools and hospitals.

Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I would like to see them kept miles away!

I strongly urge you to adopt statewide no-drill zones at distances, at least as far as those recommended in the Grand Jury report, around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around *streams*.

Allegheny County has more than a Million residents. Guess where their drinking water comes from? Our rivers! Guess what flows into our rivers? Our streams! Guess what we don't want flowing into our streams, rivers, and drinking glasses? Grabbing waste!

Don't play with people's lives. PA needs a green economy. I was stunned to learn that the outdoor recreation industry nets more income for the state of PA than the fossil fuel industry! Don't ruin such a powerful source of revenue with such a dirty and disgusting industry. I was driving to a campground in PA this summer and saw 13 fracking waste tanker trucks barreling by on the way up the hill. Guess who didn't stay at that campground?

We spent our vacation money this year on outdoor recreation in New Hampshire. Our home state of PA is missing out on lost revenue. Don't be so gross, PA!

We walk the walk! We have solar and geothermal installed on the home we built and

we have two electric cars to minimize fossil fuel use. We want you to walk the walk too, and not just talk the talk.

If you'd like a future in national politics, find a way to deliver on a promise of a healthy future for PA first.

Thank you.

Sincerely,
Melinda Guinn

RE: Please Adopt No-Drill Zones Now

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500-foot no-drill zone between fracking and homes, as well as a 5,000-foot no-drill zone for sensitive sites such as schools and hospitals.

Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to adopt statewide no-drill zones at distances, at least as far as those recommended in the Grand Jury report, around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Thank you.

Sincerely,
Walter Lewetag

RE: Please Adopt No-Drill Zones Now

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500-foot no-drill zone between fracking and homes, as well as a 5,000-foot no-drill zone for sensitive sites such as schools and hospitals.

Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to adopt statewide no-drill zones at distances, at least as far as those recommended in the Grand Jury report, around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Thank you.

Sincerely,
Eileen O'Connor

RE: Please Adopt No-Drill Zones Now

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

I myself live directly across the street from a fracking operation. I am fearful of potential health effects of this proximity to fracking for my my son, who is 2 years old. The 24/7 operations have been tiring and disruptive to my family's sleep and mental health. For a year, we could not enjoy time outside together. Windows and doors had to be closed because the sound of drilling and trucks was so disruptive. This is only the first year of this operation. Drilling will continue. We have begun to look at moving out of state, as the fracking industry is so ubiquitous across Southwestern PA.

The 43rd Statewide Investigating Grand Jury recommended a 2,500-foot no-drill zone between fracking and homes, as well as a 5,000-foot no-drill zone for sensitive sites such as schools and hospitals.

Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to adopt statewide no-drill zones at distances, at least as far as those recommended in the Grand Jury report, around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

RE: Please Adopt No-Drill Zones Now

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500-foot no-drill zone between fracking and homes, as well as a 5,000-foot no-drill zone for sensitive sites such as schools and hospitals.

Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to adopt statewide no-drill zones at distances, at least as far as those recommended in the Grand Jury report, around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Thank you.

Sincerely,
Lloyd Zeiler

RE: Please Adopt No-Drill Zones Now

Dear Sam Robinson,

Dear Mr. Robinson,

I am a Canadian clean-air and climate advocate alarmed by the impacts of your state's hydraulic-fracturing (fracking) industry.

The proximity of fracking and its related infrastructure to Pennsylvanian homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500-foot (762-metre) no-drill zone between fracking and homes, as well as a 5,000-foot (1.5-kilometre) no-drill zone for "sensitive sites" such as schools and hospitals.

Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to adopt statewide no-drill zones at distances at least as far as those recommended in the Grand Jury report around homes and "sensitive sites" such as schools and hospitals, as well as no-drill zones around streams. These distances should be as great as possible as air pollution can easily travel more than 5000' from its source.

Thank you for your time and attention to this urgent matter.

Sincerely,
David Pedersen
6744 Welch Road
Saanichton, BC V8M 1W6

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500-foot no-drill zone between fracking and homes, as well as a 5,000-foot no-drill zone for sensitive sites such as schools and hospitals.

Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to adopt statewide no-drill zones at distances, at least as far as those recommended in the Grand Jury report, around homes and sensitive sites such as schools and hospitals, as well as no-drill zones around streams.

Thank you.

Sincerely,
Jon Neumann

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at a distances of 3,281ft around homes and 5280ft for sensitive sites such as schools and hospitals, as well as no-drill zones around streams. These increased distances reflect a greater act to protect the vulnerable health of Pennsylvanians. Please act in our interest, today.

Sincerely,

Rhea Homa
742 Brunot St, Verona PA 15147

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at a distances of 3,281ft around homes and 5280ft for sensitive sites such as schools and hospitals, as well as no-drill zones around streams. These increased distances reflect a greater act to protect the vulnerable health of Pennsylvanians. Please act in our interest, today.

Sincerely,

Emily Nissley
3344 Route 130 Ste A, Harrison City PA 15636

Rebecca Stallings
2340 Eldridge St, Pittsburgh PA 15217

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at a distances of 3,281ft around homes and 5280ft for sensitive sites such as schools and hospitals, as well as no-drill zones around streams. These increased distances reflect a greater act to protect the vulnerable health of Pennsylvanians. Please act in our interest, today.

Sincerely,

David Fiedler
5188 Judson Dr, Bensalem PA 19020

Dear Sam Robinson,

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at a distances of 3,281ft around homes and 5280ft for sensitive sites such as schools and hospitals, as well as no-drill zones around streams. These increased distances reflect a greater act to protect the vulnerable health of Pennsylvanians. Please act in our interest, today.

Sincerely,

Mandy Tshibangu
47 Lakeside Ct, Devon PA 19333

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at a distances of 3,281ft around homes and 5280ft for sensitive sites such as schools and hospitals, as well as no-drill zones around streams. These increased distances reflect a greater act to protect the vulnerable health of Pennsylvanians. Please act in our interest, today.

Sincerely,

Nancy Iannuzzelli

139 Winterset Rd, Baden PA 15005

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at a distances of 3,281ft around homes and 5280ft for sensitive sites such as schools and hospitals, as well as no-drill zones around streams. These increased distances reflect a greater act to protect the vulnerable health of Pennsylvanians. Please act in our interest, today.

Sincerely,

Josh Homa
742 Brunot St, Verona PA 15147

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at a distances of 3,281ft around homes and 5280ft for sensitive sites such as schools and hospitals, as well as no-drill zones around streams. These increased distances reflect a greater act to protect the vulnerable health of Pennsylvanians. Please act in our interest, today.

Sincerely,

Larry Seymour
1052 Hack Rd, Factoryville PA 18419

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at a distances of 3,281ft around homes and 5280ft for sensitive sites such as schools and hospitals, as well as no-drill zones around streams. These increased distances reflect a greater act to protect the vulnerable health of Pennsylvanians. Please act in our interest, today.

Sincerely,

Barbara Laxon

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at a distances of 3,281ft around homes and 5280ft for sensitive sites such as schools and hospitals, as well as no-drill zones around streams. These increased distances reflect a greater act to protect the vulnerable health of Pennsylvanians. Please act in our interest, today.

Sincerely,

Shelley Meyers
126 Michael Dr, Connellsville PA 15425

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at a distances of 3,281ft around homes and 5280ft for sensitive sites such as schools and hospitals, as well as no-drill zones around streams. These increased distances reflect a greater act to protect the vulnerable health of Pennsylvanians. Please act in our interest, today.

Sincerely,

Lindsey Berk
3105 Deerfield Ct, Murrysville PA 15668

Marie Prise
844 Lynda Ln, North Versailles PA 15137

Dear Sam Robinson,

The closeness of fracking and related infrastructure to our homes, schools, hospitals, streams, and other public resources threatens people's health and these resources. Numerous studies have established that living near fracking exposes residents to unsafe levels of pollution linked to cancer, asthma, heart problems, preterm birth, birth defects, and other serious health problems.

The 43rd Statewide Investigating Grand Jury recommended a 2,500 foot no-drill zone between fracking and homes, as well as a 5,000 foot no-drill zone for sensitive sites such as schools and hospitals. Polling has shown that 74% of responding Pennsylvania residents support increased no-drill zones for fracking infrastructure from residential buildings, schools, and hospitals.

I strongly urge you to institute a statewide no-drill zone rule, at a distances of 3,281ft around homes and 5280ft for sensitive sites such as schools and hospitals, as well as no-drill zones around streams. These increased distances reflect a greater act to protect the vulnerable health of Pennsylvanians. Please act in our interest, today.

Sincerely,

Kristie Szczypinski
116 Sundial Dr, Canonsburg PA 15317
